

Fatemeh Ghalandari

Full-Stack AI Developer | React, Node.js, Python | Toronto, Ontario
+1 (365) 883 6585 | Fghalandarii@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Full-stack software developer with 4+ years of experience shipping React/Next.js applications and Node.js/Python backends. Strong fit for AI-enabled SaaS teams: hands-on LLM API integrations through project work, end-to-end MVP delivery, REST services, PostgreSQL-backed applications, automated testing, and CI/CD workflows. Known for modernizing TypeScript front ends, improving performance, and delivering secure, maintainable features through Git-based review and iterative product feedback.

CORE SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, React Native

Backend: Node.js, Express, FastAPI, REST APIs, JWT authentication, Zod validation, LLM APIs

Databases & Tools: PostgreSQL, MongoDB, Prisma, Git, GitHub Actions, Docker, Linux

Testing: Jest, Supertest, Vitest, React Testing Library, Playwright

Practices: CI/CD, Agile/Scrum, code review, debugging, performance optimization

PROFESSIONAL EXPERIENCE

TELUS International AI | Remote, Canada

AI Quality Analyst | Feb 2025 - Present

- Evaluated AI/web content at scale against detailed quality guidelines, identifying edge cases, usability issues, policy gaps, and response-quality risks through structured written analysis.
- Applied prompt-aware review and analytical judgment to improve consistency, accuracy, and user-facing quality across AI-assisted evaluation workflows.

Simor.co | Remote, Canada

Software Developer | Jan 2025 – May 2026

- Delivered a full-stack SaaS MVP from prototype to production using Next.js, React, Node.js, backend API endpoints, third-party integrations, and deployment workflows.
- Built and integrated RESTful service endpoints, connecting frontend user flows with backend logic and external APIs.
- Improved frontend performance through route-level code splitting, image optimization, reusable components, and client-side cleanup.
- Converted product feedback, staging reviews, and synthetic-data tests into iterative releases that improved usability and reduced pre-launch rework.
- Worked across feature development, debugging, code review, CI/CD, Git branching, and production release workflows.

Freelance | Tehran, Iran

Full-Stack Developer | Feb 2024 - Jul 2024

- Modernized React/TypeScript front-end codebases by refactoring UI logic into reusable modules, improving maintainability and reducing bundle complexity.
- Integrated REST APIs with defensive client-side error handling, retry logic, and clear loading/failure states to improve reliability under common service failures.
- Collaborated directly with clients to translate product requirements into implementation scopes, front-end updates, and release-ready UI improvements.

Estarbad | Tehran, Iran

Full-Stack Developer | Aug 2021 - Dec 2023

- Maintained and enhanced 10+ React and React Native applications over 2+ years, shipping feature updates, fixing production issues, and improving reliability with component-level tests and CI checks.
- Coordinated with designers and backend teams to align API contracts across multiple releases, reducing integration rework and supporting predictable delivery.
- Reviewed code, debugged hotfixes, and supported multi-application production stability through Git-based workflows and iterative QA.

SELECTED PROJECTS

Skillmate | React, Tailwind CSS, Vite, FastAPI, OpenRouter

Built a full-stack LLM-powered web app that converts YouTube videos into interactive mini-courses and flashcards, integrating a React/Vite front end with FastAPI services and external LLM APIs.

[GitHub Repository](#) | [Live Demo](#)

Ontario Service & Facility Finder | React, Node.js, Express, PostgreSQL, Prisma, JWT, Zod

Built a full-stack service directory for Ontario with search, filters, pagination, map view, admin login, protected CRUD operations, CSV export, analytics, PostgreSQL/Prisma data modeling, Zod validation, and automated backend/frontend tests.
